

Brenchley Speeding (July/August data)

Market Heath: Facing Matfield

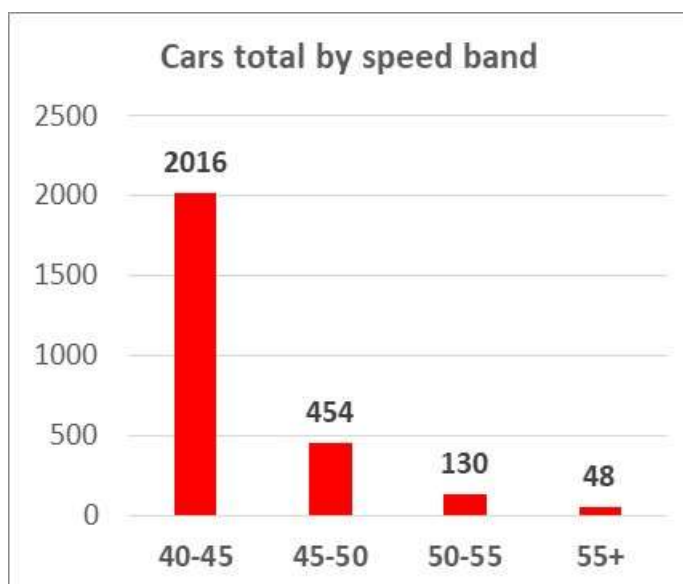

11% of cars exceeded 35 mph

The percentage of cars exceeding 35 mph was 11%, fairly typical for sites in Brenchley. What was not typical was that 48 cars exceeded 55 mph during the 29 days measured.

Excessive Speeding – three vehicles over 70mph

Thankfully, it is rare for cars to exceed 65 mph through Brenchley. However, the SID (Speed Indicator Device) at Market Heath recorded six such vehicles, including three over 70 mph! All but one of the six were late evening, early morning. As with the data from this month's Matfield SID, there was a cluster of three cars a little before 2 am on August 21st, all over 55 mph. Taken together, this possibly suggests an element of coordinated racing.

Eighteen cars were recorded in the 60-65 mph band but only two were in daylight hours.

Speed band	Date and Time
65 mph plus	03/08/2025 08:00
	10/08/2025 01:50
	14/08/2025 03:25
	20/08/2025 23:20
	21/08/2025 01:50
	21/08/2025 01:55
60-65 mph Day only	27/07/2025 19:55
	11/08/2025 19:55
