

Brenchley Speeding (April 2024)

Location: Market Heath, facing Matfield

Period: Three weeks to April 7 (2 days of data missing)

Key Issues

Nearly 16,000 cars a week drove past the Market Heath SID towards Matfield (14,000 in March's report). A third of these were over 30 mph.

About 1200 a week (8%) were over 35 mph (Police definition of speeding). This is a third higher than the March report. This is partly due to higher traffic numbers but also perhaps because the cars were going in the opposite direction (away from the school bottleneck). Five cars went past the SID at over 55, most at night/early morning but one at 10.25 (25 March)
