

Brenchley Speeding (Jan/Feb 2025)

Location: Coppers Lane junction, facing Matfield, **Period:** 21 days data

A little over 2,100 cars a day drove past the Coppers Lane junction towards Matfield, of which 550 exceeded 30mph. Nearly 80/day or 4% were over 35 mph. This percentage is lower than many of the other sites in the parish, reflecting the poor visibility and the presence of parked cars in the Brenchley Road at this location.

Around 20 cars exceeded 50mph during the 21-day period with one registering over 65 mph. Normally, these excessive speeds are seen late at night or in the early morning. But the 65mph was registered at 10am in the morning on Jan 21. Given the restricted width and poor visibility of the Brenchley Road at this site, such a speed is highly irresponsible.

Speed charts and data from Speed Indicator Device (SID) at Coppers Lane Junction

Speed band	Date and Time
65-70	21/01/2025 10:00
60-65	30/01/2025 23:45
55-60	03/02/2025 20:40
	05/02/2025 22:55
	08/02/2025 22:30
	12/02/2025 23:10
