

Matfield Speeding (July/August data)

Matfield Village Hall: from A21

12% of cars exceeded 35 mph

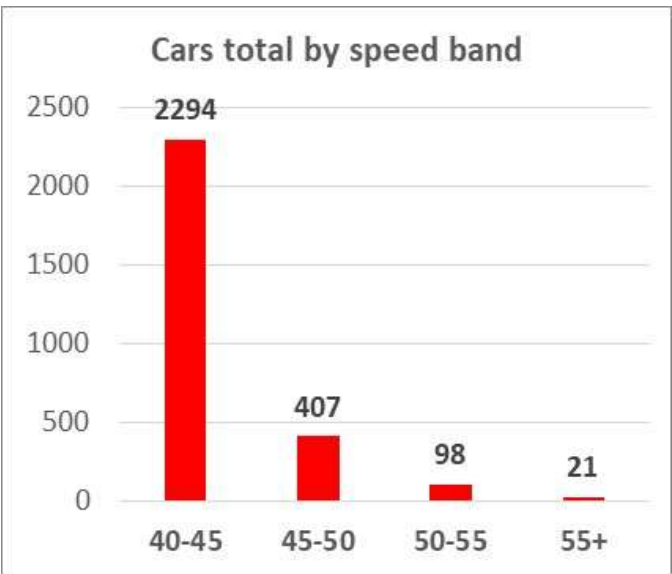

The percentage of cars exceeding 35 mph (12%) is fairly typical for sites in Matfield, unfortunately. But this 2222222222is well down on last month's 15%.

Excessive Speeding

Although only 2% of cars exceeded 40 mph, this still amounts to around 2,800 vehicles. Worryingly, there were four that were over 60 mph (versus none last month). These were all early morning.

On August 21, between 1.50 and 2 am, four cars exceeded 50 mph through the village, including 2 over 60 mph. As all of these were in the same 10-minute period, this might be evidence of cars racing each other. A similar cluster was observed in Brenchley.

Excessive speeding during daylight hours is still evident - seven cars were recorded at between 55 and 60 mph with a further 14 overnight.

Speed band	Date and Time
60 mph +	10/08/2025 01:50
	14/08/2025 01:50
