

Brenchley Speeding (August/ September data)

Sarum, Coppers Lane: Facing Matfield

6% of cars exceeded 35 mph

Only 6% of the 69,000 cars recorded going towards Brenchley from Matfield exceeded 35 mph. This is a relatively low percentage but is still nearly 4,000 cars. Having said that, the Brenchley road often has cars parked on the road side near the allotments and it has a fairly sharp bend just past the Coppers Lane junction. This may deter some potential speeders.

Excessive Speeding

The level of excessive speeding was (thankfully) lower than in last month's report. Even so, 16 cars were recorded over 55 mph, including 2 over 60. Most of these speeders were recorded in the late evening/early morning. But one car was recorded at 2.45pm on August 23rd.
