

Brenchley Speeding

Market Heath: traffic coming from Brenchley (Jan 8 till Feb 5)

3% of cars exceeded 35 mph, half “normal” levels

Around 2,700 cars a day passed the Speed Indicator Device going towards Matfield. Around 3% exceeded 35 mph, half the level seen when the SID was last in this position.

Excessive speed also lower

Six cars exceeded 55 mph during the period, including 2 over 60 mph. This is around a third of the level seen the last time the SID was sited at Market Heath. All bar one of the “55-plus” speeders were late in the evening. The exception was at 6.30 pm on New Years Eve when the roads would likely have been relatively busy.
